Art Unit: 3751

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a kitchen apparatus, classified in class 4, subclass 619.

II. Claims 10-25, drawn to a decorative sink display method, classified in class 4, subclass 661.

The inventions are independent or distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product can be used in a process not requiring a sink to be provided or manufactured.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to divergent fields of search, restriction for examination purposes as indicated is proper.
